## Datasheet for ABIN7491145 SARS-CoV-2 Spike Protein (BA.5 - Omicron, RBD) (Fc Tag)

## Overview

| Quantity:                     | 100 µg   |
|-------------------------------|--|
| Target:                       | SARS-CoV-2 Spike   |
| Protein Characteristics:      | BA.5 - Omicron, RBD  |
| Origin:                       | SARS Coronavirus-2 (SARS-CoV-2), SARS CoV-2 Omicron                              |
| Source:                       | HEK-293 Cells  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This SARS-CoV-2 Spike protein is labelled with Fc Tag.                           |
| Product Details               |  |
| Purpose:                      | Recombinant SARS-CoV-2 (Omicron BA.5) S-RBD protein with C-terminal human Fc tag |

| Purpose:                    | Recombinant SARS-CoV-2 (Omicron BA.5) S-RBD protein with C-terminal human Fc tag  |
|-----------------------------|---|
| Specificity:                | S protein RBD (G339D, S371F, S373P, S375F, T376A, D405N, R408S, K417N,N440K,<br>L452R,S477N, T478K, E484A,F486V, Q498R, N501Y, Y505H) (Arg319-Phe541) hFc (Glu99- |
| Characteristics:            | Ala330)<br>Extracellular Domain Protein   |
| Characteristics:<br>Purity: | The purity of the protein is greater than 95 % as determined by SDS-PAGE and Coomassie blue   |
| r unty.                     | staining.   |

## Target Details

| Target:      | SARS-CoV-2 Spike          |
|--------------|---------------------------|
| Abstract:    | SARS-CoV-2 Spike Products |
| Target Type: | Viral Protein             |

| Target Details      |  |
|---------------------|--|
| Background:         | SARS-CoV-2 BA.5 (Omicron) Spike RBD Protein  |
|                     | Description: SARS-CoV-2 (Severe Acute Respiratory Syndrome Coronavirus 2) also known as              |
|                     | Covid19 (2019 Novel Coronavirus) is a virus that causes illnesses ranging from the common            |
|                     | cold to severe diseases. The spike protein is a type I transmembrane protein containing two          |
|                     | subunits, S1 and S2. S1 mainly contains a receptor binding domain (RBD), which accounts for          |
|                     | recognizing the cell surface receptor, ACE2. S2 contains basic elements needed for the               |
|                     | membrane fusion. Recent publications indicate that S1-RBD domain can induce virus                    |
|                     | neutralizing-antibody and T cell response.   |
| Molecular Weight:   | predicted molecular mass of 51.4 kDa after removal of the signal peptide. The apparent               |
|                     | molecular mass of S-RBD(Omicron BA.5)-hFc is 55-70 kDa due to glycosylation.                         |
| UniProt:            | P0DTC2   |
| Application Details |  |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Buffer:             | sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants before lyophilization.     |
| Storage:            | -20 °C,-80 °C  |
| Storage Comment:    | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for |
|                     | use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).                |
|                     | Lyophilized proteins are shipped at ambient temperature.   |
| Expiry Date:        | 12 months  |
