Target Details

Background:	Synonyms: KIAA0199, SCAP, SCAP_HUMAN, SREBF chaperone, SREBF chaperone protein, SREBP cleavage activating protein, SREBP cleavage-activating protein, Sterol regulatory element binding protein cleavage-activating protein, Sterol regulatory element-binding protein cleavage-activating protein. Background: SCAP is an escort protein required for cholesterol and lipid homeostasis. Cholesterol homeostasis in animal cells is achieved by regulated cleavage of SREBPs, membrane-bound transcription factors. SCAP forms a complex with SREBPs in order to release the active domains of SREBPs.
