# UBASH3B Protein (AA 380-649) (His tag)

#### Overview

Quantity:	100 μg
Target:	UBASH3B (STS1)
Protein Characteristics:	AA 380-649
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This UBASH3B protein is labelled with His tag.

#### **Product Details**

Purpose:	Human UBASH3B/STS1 Protein
Sequence:	Gly380-Glu649
Characteristics:	Recombinant Human UBASH3B/STS1 Protein is expressed from E.coli with His tag at the N-Terminus.It contains Gly380-Glu649.
Purity:	> 95 % as determined by Tris-Bis PAGE,> 95 % as determined by HPLC
Sterility:	0.22 µm filtered
Endotoxin Level:	Less than 1EU per μg by the LAL method.

## **Target Details**

Target:	UBASH3B (STS1)
Alternative Name:	UBASH3B (STS1 Products)

## **Target Details**

Expiry Date:

12 months

in multiple cell types. UBASH3B/STS-1/TULA-2 is a highly active protein tyrosine phosp its major target appears to be a specific regulatory site of protein tyrosine kinases of th family, dephosphorylation of which inhibits Syk and Zap-70 kinases and suppresses recisional signaling mediated by these kinases.  Molecular Weight:  31.88 kDa same as Tris-Bis PAGE result.  UniProt:  Q8TF42  Application Details  Restrictions:  For Research Use only  Handling  Format:  Lyophilized  Reconstitution:  Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µc recommended. Dissolve the lyophilized protein in distilled water.  Buffer:  Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8 % trehalose is ad protectant before lyophilization.	2 0 (0.110
