| Target Details | |
|---------------------|--|
| Target: | TCR gamma/delta |
| Alternative Name: | TCR gamma/delta (TCR gamma/delta Products) |
| Background: | The antigen-specific T cell receptor (TCR) is composed of either alpha and beta subunit, or gamma and delta subunit. Majority of T cells present in the blood, lymph and secondary |
| | |
| | lymphoid organs express TCR alpha/beta heterodimers, whereas the T cells expressing TCR gamma/delta heterodimers are localized mainly in epithelial tissues and at the sites of |
| | infection. The subunits of TCR heterodimers are covalently bonded and in the endoplasmic |
| | |
| | reticulum they associate with CD3 subunits to form functional TCR-CD3 complex. Lack of |
| | expression of any of the chains is sufficient to stop cell surface expression.,TCRG/D |
| Application Details | |
| Application Notes: | Flow cytometry: The reagent is designed for analysis of human blood cells using 10 μ L reagent |
| | / 100 μL of whole blood or 10 ⁶ cells in a suspension. The content of a vial (1 ml) is sufficient for |
| | 100 tests. |
| Restrictions: | For Research Use only |
| Handling | |
| Buffer: | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide |
| Preservative: | Sodium azide |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which |
| | should be handled by trained staff only. |
| Storage: | 4 °C |
| Storage Comment: | Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze. |
