Alternative Name:	PPM1D (PPM1D Products)	
Background:	Protein phosphatase, Mg2+/Mn2+ dependent 1D,PPM1D is a Mg2+/Mn2+ dependent protein phosphatase 1D with inducible expression in response to various types of environmental stress. This expression is p53-dependent, and subsequently PPM1D negatively regulates the p53-mediated transcription, thus it suppresses the apoptosis. PPM1D contributes to development of carcinomas, and seems to be a promissing therapeutic target. Amplification of PPM1D is associated with breast cancer.,WIP1, Protein phosphatase 1D, JDVS, WIP1, IDDGIP
