

Datasheet for ABIN7519854 CCL6 Protein (His tag)

Target Details

Overview Quantity: 10 µg CCL6 Target: Origin: Mouse Source: HEK-293 Cells Protein Type: Recombinant Purification tag / Conjugate: This CCL6 protein is labelled with His tag. **Product Details** Recombinant Mouse CCL6 Protein Purpose: GLIQEMEKED RRYNPPIIHQ GFQDTSSDCC FSYATQIPCK RFIYYFPTSG GCIKPGIIFI Sequence: SRRGTQVCAD PSDRRVQRCL STLKQGPRSG NKVIA Specificity: Gly22 - Ala116 > 97 % by SDS-PAGE. Purity: Sterility: 0.22 µm filtered Endotoxin Level: <1EU/µg

Target:	CCL6
Alternative Name:	CCL6 (CCL6 Products)
Background:	Description: Chemokine (C-C motif) ligand 6 (CCL6), also known as C-C chemokine C10 has

	only been identified in rodents, which is a small cytokine belonging to the CC chemokine family,
	beta-chemokine subfamily. C-C chemokine C10 is involved in the chronic stages of host
	defense reactions. C10 chemokine rapidly promotes disease resolution in the cecal ligation and
	puncture (CLP) model through its direct effects on the cellular events critically involved in host
	defense during septic peritonitis. CCL6 appears to contribute to the macrophage infiltration that
	is independent of other CC chemokines. C10 is a prominent chemokine expressed in the central
	nervous system in experimental inflammatory demyelinating disease, also acts as a potent
	chemotactic factor for the migration of these leukocytes to the brain. CCL6 may be a mediator
	released by microglia for cell-cell communication under physiological as well as pathological
	conditions of CNS. Additionally, the chemokine CCL6 may alter tumor behavior by relieving its
	growth factor dependency and by promoting invasiveness as a result of local tissue apoptosis.
	Name: c10, MRP-1, Scya6,CCL6
Gene ID:	20305
UniProt:	P27784

Application Details

Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Reconstitution:	Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid votex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1 % BSA, 5 % HSA, 10 % FBS or 5 % Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.
Concentration:	1.3 mg/mL
Buffer:	Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.
Storage:	-20 °C,-80 °C
Storage Comment:	Store the lyophilized protein at -20°C to -80°C for 12 months. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
