Datasheet for ABIN7520561 TFF1 Protein (pSer2) (His tag)

Overview

Quantity:	10 µg
Target:	TFF1
Protein Characteristics:	pSer2
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TFF1 protein is labelled with His tag.

Product Details

Purpose:	Recombinant Human BCEI/PS2/TFF1 Protein
Sequence:	EAQTETCTVA PRERQNCGFP GVTPSQCANK GCCFDDTVRG VPWCFYPNTI DVPPEEECEF
Specificity:	Glu25-Phe84
Purity:	> 97 % by SDS-PAGE.
Sterility:	0.22 µm filtered
Endotoxin Level:	< 0.001 EU/µg

Target Details

Target:	TFF1
Alternative Name:	BCEI//TFF1 (TFF1 Products)
Background:	Description: Trefoil Factor 1 (TFF1), also known as pS2, is one of three structurally related

	secreted proteins that contain trefoil domains. These domains adopt a three-leaved
	conformation held together by conserved intrachain disulfide bonds. TFF1 is an approximately
	7 kDa peptide that plays an important role in epithelial regeneration and wound healing (1).
	Mature human TFF1 shares 67 % amino acid sequence identity with mouse and rat TFF1. It is
	expressed by goblet cells of the gastric and intestinal mucosa and by conjunctival goblet cells
	(2-5). TFF1 is a copper-binding protein that can form disulfide-linked homodimers, associate
	into disulfide-linked complexes with Gastrokine 2, and form non-covalent complexes with the
	mucin MUC5AC (4, 6-8). Copper enhances TFF1 homodimerization as well as its ability to
	promote epithelial cell motility, wound healing, and the colonization of H. pylori in stomach and
	colon epithelia (9, 10). TFF1 is down-regulated during the progression from gastritis to gastric
	dysplasia to gastric cancer, although it is up-regulated in breast and prostate cancers (11-13).
	TFF1 inhibits the formation of calcium oxalate crystals, and its excretion in the urine is reduced
	in patients with kidney stones (14).
	Name: pS2, BCEI, HPS2, HP1.A, pNR-2, D21S21,TFF1
Gene ID:	7031
UniProt:	P04155
Pathways:	EGFR Signaling Pathway

Application Details

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Reconstitution:	Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid votex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stablizer (e.g. 0.1 % BSA, 5 % HSA, 10 % FBS or 5 % Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.
Concentration:	1.1 mg/mL
Buffer:	Lyophilized from a 0.22 μm filtered solution of PBS, pH 7.4.
Storage:	-20 °C,-80 °C
Storage Comment:	Store the lyophilized protein at -20°C to -80°C for 12 months. After reconstitution, the protein solution is stable at -20°C for 3 months, at 2-8°C for up to 1 week.
