Target Details

Background:	Synonyms: APG12, FBR93, APG12L, HAPG12, Ubiquitin-like protein ATG12, Autophagy-related	
	protein 12, APG12-like, ATG12	
	Background: Ubiquitin-like protein involved in autophagy vesicles formation. Conjugation with	
	ATG5 through a ubiquitin-like conjugating system involving also ATG7 as an E1-like activating	
	enzyme and ATG1 as an E2-like conjugating enzyme, is essential for its function. The ATG12-	
	ATG5 conjugate acts as an E3-like enzyme which is required for lipidation of ATG8 family	
	proteins and their association to the vesicle membranes. The ATG12-ATG5 conjugate also	
	regulates negatively the innate antiviral immune response by blocking the type I IFN production	
	pathway through direct association with RARRES3 and MAVS. Plays also a role in translation or	
	delivery of incoming viral RNA to the translation apparatus.
