## Datasheet for ABIN752827 anti-PHKB antibody (AA 45-160) (HRP)

Overview

| Quantity:            | 100 µL   |
|----------------------|--|
| Target:              | РНКВ   |
| Binding Specificity: | AA 45-160  |
| Reactivity:          | Human  |
| Host:                | Rabbit   |
| Clonality:           | Polyclonal   |
| Conjugate:           | This PHKB antibody is conjugated to HRP  |
| Application:         | Western Blotting (WB), ELISA, Immunohistochemistry (Frozen Sections) (IHC (fro)),<br>Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)) |

## Product Details

Alternative Name:

| Immunogen:                      | KLH conjugated synthetic peptide derived from human PHKB |
|---------------------------------|--|
| lsotype:                        | lgG  |
| Cross-Reactivity:               | Human  |
| Predicted Reactivity:           | Mouse,Rat,Dog,Cow,Pig,Horse,Rabbit                       |
| Purification:                   | Purified by Protein A.                                   |
|                                 |  |
| Target Details                  |  |
| Target:                         | РНКВ   |
| Purification:<br>Target Details | Purified by Protein A.                                   |

PHKB (PHKB Products)

| Target Details      |   |  |
|---------------------|---|--|
| Background:         | Synonyms: Phosphorylase B, Phosphorylase kinase B, Phosphorylase kinase beta polypeptide,<br>Phosphorylase kinase beta subunit, DKFZp781E15103, FLJ41698, KPBB_HUMAN.<br>Background: Phosphorylase kinase is a polymer of 16 subunits, four each of alpha, beta,<br>gamma and delta. The alpha subunit includes the skeletal muscle and hepatic isoforms,<br>encoded by two different genes. The beta subunit is the same in both the muscle and hepatic<br>isoforms, encoded by this gene, which is a member of the phosphorylase b kinase regulatory<br>subunit family. The gamma subunit also includes the skeletal muscle and hepatic isoforms,<br>encoded by two different genes. The delta subunit is a calmodulin and can be encoded by three<br>different genes. The gamma subunits contain the active site of the enzyme, whereas the alpha<br>and beta subunits have regulatory functions controlled by phosphorylation. The delta subunit<br>mediates the dependence of the enzyme on calcium concentration. Mutations in this gene<br>cause glycogen storage disease type 9B, also known as phosphorylase kinase deficiency of<br>liver and muscle. Alternatively spliced transcript variants encoding different isoforms have been<br>identified in this gene. Two pseudogenes have been found on chromosomes 14 and 20,<br>respectively.[provided by RefSeq, Feb 2010]. |  |
| Gene ID:            | 5257  |  |
| Pathways:           | Cellular Glucan Metabolic Process   |  |
| Application Details |   |  |
| Application Notes:  | WB 1:300-5000<br>IHC-P 1:200-400<br>IHC-F 1:100-500   |  |
| Restrictions:       | For Research Use only   |  |
| Handling            |   |  |
| Format:             | Liquid  |  |
| Concentration:      | 1 μg/μL   |  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.   |  |
| Preservative:       | ProClin   |  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.  |  |

| Handling         |  |
|------------------|--|
| Handling Advice: | Do NOT add Sodium Azide! Use of Sodium Azide will inhibit enzyme activity of horseradish peroxidase. |
| Storage:         | -20 °C   |
| Storage Comment: | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                    |
| Expiry Date:     | 12 months  |
