Target Details

Alternative Name:	Glycerol kinase (GK Products)
Background:	Synonyms: ATP glycerol 3 phosphotransferase, GK, GK1, GK2, GKD, Glycerokinase, Glycerol kinase, Glycerol kinase deficiency, ATP:glycerol 3-phosphotransferase, GLPK_HUMAN. Background: Glycerol kinase catalyzes the formation of glycerol 3 phosphate from ATP and glycerol. Dihydroxyacetone and L glyceraldehyde can also act as acceptors, UTP and, in the case of the yeast enzyme, ITP and GTP can act as donors. It provides a way for glycerol derived from fats or glycerides to enter the glycolytic pathway.
Gene ID:	2710, 2712
