Datasheet for ABIN7534116  
**BMPRI1A Protein (Fc Tag,His tag)**

### Overview

Quantity:	100 µg
Target:	BMPRI1A
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Biological Activity:	Active
Purification tag / Conjugate:	This BMPRI1A protein is labelled with Fc Tag,His tag.

### Product Details

Purpose:	Active Recombinant Human BMPRI1A/ALK-3/CD292 Protein
Sequence:	QNLDSMLHGT GMKSDSDQKK SENGVTLAPE DTLPFLKCYC SGHCPDDAIN NTCITNGHCF AIIEDDQGE TTLASGCMKY EGSDFQCKDS PKAQLRRTIE CCRTNLCNQY LQPTLPPVVI GPFFDGSIR
Specificity:	Gln24-Arg152
Purity:	> 95 % by SDS-PAGE.
Sterility:	0.22 µm filtered
Endotoxin Level:	< 0.1 EU/µg of the protein by LAL method.
Biological Activity Comment:	Measured by its binding ability in a functional ELISA. Immobilized Human ACVR2B at 1 µg/mL (100 µL/well) can bind Human BMPRI1A with a linear range of 0.5-62.5 ng/mL.

## Target Details

---

Target:	BMPR1A
Alternative Name:	BMPR-1A/ALK-3/CD292 ( <a href="#">BMPR1A Products</a> )
Background:	<p>Description: The bone morphogenetic protein (BMP) receptors are a family of transmembrane serine/threonine kinases that include the type I receptors BMPR1A and BMPR1B and the type II receptor BMPR2. These receptors are also closely related to the activin receptors, ACVR1 and ACVR2. The ligands of these receptors are members of the TGF-beta superfamily. TGF-betas and activins transduce their signals through the formation of heteromeric complexes with 2 different types of serine (threonine) kinase receptors: type I receptors of about 50-55 kD and type II receptors of about 70-80 kD. Type II receptors bind ligands in the absence of type I receptors, but they require their respective type I receptors for signaling, whereas type I receptors require their respective type II receptors for ligand binding.</p> <p>Name: BMPR1A,10q23del,ACVRLK3,ALK3,CD292,SKR5</p>
Gene ID:	657
UniProt:	<a href="#">P36894</a>
Pathways:	<a href="#">Stem Cell Maintenance</a>

## Application Details

---

Restrictions: For Research Use only

## Handling

---

Format:	Lyophilized
Reconstitution:	Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1 % BSA, 5 % HSA, 10 % FBS or 5 % Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles.
Buffer:	Lyophilized from a 0.22 µm filtered solution of PBS, pH 7.4.
Storage:	-20 °C,-80 °C
Storage Comment:	<p>Store the lyophilized protein at -20°C to -80 °C for long term.</p> <p>After reconstitution, the protein solution is stable at -20 °C for 3 months, at 2-8 °C for up to 1 week.</p>
