Datasheet for ABIN7536684  
**anti-Factor VIII C antibody**

### Overview

Quantity:	5 mg
Target:	Factor VIII C
Reactivity:	Dog
Host:	Sheep
Clonality:	Polyclonal
Conjugate:	This Factor VIII C antibody is un-conjugated
Application:	ELISA, Western Blotting (WB), Neutralization (Neut), Immunoprecipitation (IP), Immunoelectrophoresis (IEP), Immunodepletion (IDe)

### Product Details

Purpose:	Canine Factor VIII Polyclonal Antibody
Immunogen:	Recombinant canine FVIII (cFVIII)
Isotype:	IgG
Specificity:	Canine Factor VIII
Purification:	Fractionation of IgG from antiserum

### Target Details

Target:	Factor VIII C
Alternative Name:	Factor VIII:C ( <a href="#">Factor VIII C Products</a> )

## Application Details

---

Application Notes: Immunoblot 5-25 µg/mL, ELISA capture 20-50 µg/mL

---

Comment: Whole IgG is a base level product and refers to IgG antibodies purified from antiserum using multiple precipitation and dialysis steps. The purity of the IgG is typically 90% and is provided in a solution of HEPES buffered saline containing 50% glycerol (v/v). The titre is essentially the same as the starting antiserum and each vial typically contains the amount of IgG recovered from one millilitre of antiserum. This level of product is generally intended for use in applications such as immunoprecipitation, immunoelectrophoresis, immuno-depletion and activity neutralization assays.

---

Restrictions: For Research Use only

---

## Handling

---

Format: Liquid

---

Reconstitution: Allow product to warm to room temperature and gently mix before use

---

Concentration: 5 mg/mL

---

Buffer: 10 mM HEPES, pH 7.4, 150 mM NaCl, 50 % (v/v) glycerol

---

Storage: -20 °C

---

Storage Comment: Store between -10°C and -20°C

---
