

Datasheet for ABIN7536719  
**anti-Prekallikrein antibody (HRP)**

[Go to Product page](#)

## Overview

Quantity:	0.1 mg
Target:	Prekallikrein (PK)
Reactivity:	Human
Host:	Sheep
Clonality:	Polyclonal
Conjugate:	This Prekallikrein antibody is conjugated to HRP
Application:	Western Blotting (WB), ELISA, Flow Cytometry (FACS), Immunoassay (IA)

## Product Details

Purpose:	Prekallikrein Polyclonal Antibody - Affinity Purified - HRP Conjugated
Immunogen:	Human active site-blocked kallikrein prepared from plasma
Isotype:	IgG
Specificity:	Human Prekallikrein, PK, Fletcher factor
Purification:	Antigen-specific affinity purification

## Target Details

Target:	Prekallikrein (PK)
Alternative Name:	Prekallikrein ( <a href="#">PK Products</a> )

## Application Details

Application Notes:	Immunoblot 1 µg/mL, ELISA detecting 2 µg/mL
Comment:	Affinity-purified IgG are antibodies further purified using immobilized antigen. Affinity-purification is an enrichment process in which whole IgG is passed over a resin to which antigen has been covalently attached. Non-reactive antibodies are washed away and specific antibodies are eluted under conditions that disrupt the antigen-antibody interaction. The result is a very high-purity product with a substantially higher titre than whole IgG. This level of product is intended for applications such as immunoblotting, immunostaining of cells and several types of immunoassays where the higher signal-to-noise ratio achieved with this enriched product is required.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Reconstitution:	Allow product to warm to room temperature and gently mix before use
Concentration:	1 mg/mL
Buffer:	A buffered stabilizer solution containing 50 % (v/v) glycerol
Storage:	-20 °C
Storage Comment:	Store between -10°C and -20°C
