Datasheet for ABIN7536754
anti-SERPIND1 antibody (HRP)

Overview

Quantity:	0.1 mg
Target:	SERPIND1
Reactivity:	Human
Host:	Goat
Clonality:	Polyclonal
Conjugate:	This SERPIND1 antibody is conjugated to HRP
Application:	Western Blotting (WB), ELISA, Immunoassay (IA), Flow Cytometry (FACS)

Product Details

Purpose:	Heparin Cofactor II Polyclonal Antibody - Affinity Purified - HRP Conjugated
Immunogen:	Human Heparin Cofactor II (HCII) purified from plasma
Isotype:	IgG
Specificity:	Human Heparin Cofactor II, HCII
Purification:	Antigen-specific affinity purification

Target Details

Target:	SERPIND1
Alternative Name:	Heparin Cofactor II (SERPIND1 Products)

Application Details

Application Notes: Immunoblot 1 µg/mL, ELISA detecting 2 µg/mL

Comment: Affinity-purified IgG are antibodies further purified using immobilized antigen. Affinity-purification is an enrichment process in which whole IgG is passed over a resin to which antigen has been covalently attached. Non-reactive antibodies are washed away and specific antibodies are eluted under conditions that disrupt the antigen-antibody interaction. The result is a very high-purity product with a substantially higher titre than whole IgG. This level of product is intended for applications such as immunoblotting, immunostaining of cells and several types of immunoassays where the higher signal-to-noise ratio achieved with this enriched product is required.

Restrictions: For Research Use only

Handling

Format: Liquid

Reconstitution: Allow product to warm to room temperature and gently mix before use

Concentration: 1 mg/mL

Buffer: A buffered stabilizer solution containing 50 % (v/v) glycerol

Storage: -20 °C

Storage Comment: Store between -10°C and -20°C
