

Datasheet for ABIN7536761 **anti-SERPINA5 antibody**

[Go to Product page](#)

Overview

Quantity:	0.5 mg
Target:	SERPINA5
Reactivity:	Human
Host:	Goat
Clonality:	Polyclonal
Conjugate:	This SERPINA5 antibody is un-conjugated
Application:	Western Blotting (WB), ELISA, Immunoprecipitation (IP), Neutralization (Neut), Immunodepletion (IDe), Immunoelectrophoresis (IEP)

Product Details

Purpose:	PCI - Protein C Inhibitor Polyclonal Antibody - Affinity Purified
Immunogen:	Human protein C Inhibitor purified from plasma
Isotype:	IgG
Specificity:	Human protein C Inhibitor, PCI
Purification:	Antigen-specific affinity purification

Target Details

Target:	SERPINA5
Alternative Name:	PCI - Protein C Inhibitor (SERPINA5 Products)

Application Details

Application Notes:	Immunoblot 0.5-5 µg/mL, ELISA capture 10 µg/mL
Comment:	Affinity-purified IgG are antibodies further purified using immobilized antigen. Affinity-purification is an enrichment process in which whole IgG is passed over a resin to which antigen has been covalently attached. Non-reactive antibodies are washed away and specific antibodies are eluted under conditions that disrupt the antigen-antibody interaction. The result is a very high-purity product with a substantially higher titre than whole IgG. This level of product is intended for applications such as immunoblotting, immunostaining of cells and several types of immunoassays where the higher signal-to-noise ratio achieved with this enriched product is required.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Reconstitution:	Allow product to warm to room temperature and gently mix before use
Concentration:	2 mg/mL
Buffer:	10 mM HEPES, pH 7.4, 150 mM NaC, 50 % (v/v) glycerol
Storage:	-20 °C
Storage Comment:	Store between -10°C and -20°C
