Datasheet for ABIN7538085

Recombinant anti-PSMA (Rosopatamab Biosimilar) antibody

Overview

Quantity:	100 µg
Target:	PSMA (Rosopatamab Biosimilar)
Reactivity:	Human
Host:	Humanized
Antibody Type:	Recombinant Antibody
Clonality:	Chimeric
Conjugate:	This PSMA (Rosopatamab Biosimilar) antibody is un-conjugated
Application:	ELISA, Western Blotting (WB)

Product Details

Purpose:	Rosopatamab Biosimilar - Anti-FOLH1 mAb - Research Grade
Isotype:	IgG1 kappa
Characteristics:	Antibody Type: IgG1-kappa
Purity:	> 85%
Grade:	Research Grade

Target Details

Target:	PSMA (Rosopatamab Biosimilar)
Background:	Rosopatamab (HuJ591) is a humanized anti-PSMA IgG1 monoclonal antibody that can be used in cancer research, especially prostate cancer. Rosopatamab can be linked to the low-energy

Target Details

beta-emitting radioisotope lutetium-177 (177Lu) through the bifunctional chelator DOTA-NHS ester to obtain a radioimmunoconjugate that targets malignant prostate cells with high efficiency.

CAS-No: 2260767-49-3

Application Details

Restrictions: For Research Use only

Handling

Buffer: PBS buffer PH7.5

Storage: -80 °C

Storage Comment: store at -80°C
