## Datasheet for ABIN7538091 anti-Histamine antibody

### Overview

|              |  |
|--------------|--|
| Quantity:    | 100 µL                                   |
| Target:      | Histamine (HIS)                          |
| Reactivity:  | Various Species                          |
| Host:        | Rabbit                                   |
| Clonality:   | Polyclonal                               |
| Conjugate:   | This Histamine antibody is un-conjugated |
| Application: | ELISA, Western Blotting (WB)             |

### Product Details

|                             |   |
|-----------------------------|---|
| Purpose:                    | Rabbit polyclonal antibodies to Histamine   |
| Immunogen:                  | Histamine dihydrochloride conjugated to KLH |
| Isotype:                    | IgG, IgM                                    |
| Specificity:                | Histamine                                   |
| Cross-Reactivity (Details): | All species                                 |
| Purification:               | Immunogen affinity column                   |

### Target Details

|                   |  |
|-------------------|--|
| Target:           | Histamine (HIS)                            |
| Alternative Name: | Histamine ( <a href="#">HIS Products</a> ) |
| Target Type:      | Chemical                                   |

## Target Details

---

Background: Histamine is an organic nitrogenous compound involved in local immune responses as well as regulating physiological function in the gut and acting as a neurotransmitter. Histamine is involved in the inflammatory response.

---

Molecular Weight: 111 Da

---

## Application Details

---

Application Notes: Western blot: 0.1-1.0 µg/mL

---

Restrictions: For Research Use only

---

## Handling

---

Format: Liquid

---

Concentration: Lot specific

---

Buffer: Glycine pH 7.2

---

Storage: 4 °C, -80 °C

---

Storage Comment: Short term up to 1 month at 2-8°C, long term can be held for up to five years at -70°C

---
