## Datasheet for ABIN7538278

#### **GPR50 Protein**

#### Overview

Quantity:	50 μg
Target:	GPR50
Origin:	Human
Source:	Mammalian Cells
Protein Type:	Synthetic Nanodisc

#### **Product Details**

Purpose:	Human MTR1L full length protein-synthetic nanodisc
Characteristics:	Unlike other membrane scaffold protein (MSP) Nanodisc on the market, our synthetic Nanodisc
	can be prepared directly from the cells. The polymers used during this process have a dual
	function. It dissolves the cell membranes, like the detergent, and uses cellular phospholipids to
	form Nanodisc around the membrane proteins. The target protein embedded Nanodiscs can
	then be purified.

## Target Details

Target:	GPR50
Alternative Name:	MTR1L (GPR50 Products)
Background:	This gene product belongs to the G-protein coupled receptor 1 family. Even though this protein shares similarity with the melatonin receptors, it does not bind melatonin, however, it inhibits melatonin receptor 1A function through heterodimerization. Polymorphic variants of this gene have been associated with bipolar affective disorder in women. [provided by RefSeq, Jan 2010]
Molecular Weight:	The human full length MTR1L protein has a MW of 67.4kDa

# **Target Details** UniProt: Q13585 **Application Details** Advantages of Synthetic Nanodiscs: Comment: · Highly purified membrane proteins · High solubility in aqueous solutions · High stability · Proteins are in a native membrane environment and remain biologically active · No detergent and can be used for cell-based assays · No MSP backbone proteins Limitations of Synthetic Nanodiscs: · Intolerant to acids and high concentrations of divalent metal ions Restrictions: For Research Use only Handling Lyophilized Format: Buffer: Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0).

Normally 5 % - 8 % trehalose is added as protectants before lyophilization.

Lyophilized proteins are shipped at ambient temperature.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for

use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

-20 °C,-80 °C
