## Datasheet for ABIN7538282 GPR62 Protein

#### Overview

Quantity:	50 µg
Target:	GPR62
Origin:	Human
Source:	Mammalian Cells
Protein Type:	Synthetic Nanodisc

#### **Product Details**

Purpose:	Human GPR62 full length protein-synthetic nanodisc
Characteristics:	Unlike other membrane scaffold protein (MSP) Nanodisc on the market, our synthetic Nanodisc
	can be prepared directly from the cells. The polymers used during this process have a dual
	function. It dissolves the cell membranes, like the detergent, and uses cellular phospholipids to
	form Nanodisc around the membrane proteins. The target protein embedded Nanodiscs can
	then be purified.

### Target Details

Target:	GPR62
Alternative Name:	GPR62 (GPR62 Products)
Background:	Orphan G-protein coupled receptor. Constitutively activates the $G(q/11)$ /inositol phosphate and
	the G(s)-alpha/cAMP signaling pathways (PubMed:28827538). Has spontaneous activity for
	beta-arrestin recruitment (PubMed:28827538). Shows a reciprocal modulation of signaling
	functions with the melatonin receptor MTNR1B most likely through receptor heteromerization
	(PubMed:28827538).[UniProtKB/Swiss-Prot Function]

Target Details	
Molecular Weight:	The human full length GPR62 protein has a MW of 37.6kDa
UniProt:	Q9BZJ7
Application Details	
Comment:	Advantages of Synthetic Nanodiscs:
	<ul><li>Highly purified membrane proteins</li><li>High solubility in aqueous solutions</li><li>High stability</li></ul>
	Proteins are in a native membrane environment and remain biologically active
	<ul><li>No detergent and can be used for cell-based assays</li><li>No MSP backbone proteins</li></ul>
	Limitations of Synthetic Nanodiscs:
	Intolerant to acids and high concentrations of divalent metal ions
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Buffer:	Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0).
	Normally 5 % - 8 % trehalose is added as protectants before lyophilization.
Storage:	-20 °C,-80 °C
Storage Comment:	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
