Datasheet for ABIN7538318 HBSAg Protein (AA 2-119) (Fc Tag)

2 Images

Overview

Quantity:	50 µg
Target:	HBSAg (HBsAg)
Protein Characteristics:	AA 2-119
Origin:	Hepatitis B Virus (HBV)
Source:	Mammalian Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This HBSAg protein is labelled with Fc Tag.

Product Details

Purpose:	Recombinant Hepatitis B virus HBSAG Protein with C-terminal human Fc tag
Specificity:	HBSAG (Gly2-Ala119) hFc (Glu99-Ala330)
Characteristics:	Extracellular Domain Protein
Purification:	Purified from cell culture supernatant by affinity chromatography
Purity:	The purity of the protein is greater than 95 % as determined by SDS-PAGE and Coomassie blue
	staining.

Target Details

Target:	HBSAg (HBsAg)
Alternative Name:	HBSAG (HBsAg Products)
Target Type:	Viral Protein

Target D	Details
----------	---------

Background:	Hepatitis B virus (HBV) is a human pathogen, causing serious liver disease. At the center of the
	hepatitis B virus is DNA, which contains the genes the virus uses to replicate itself. Surrounding
	the DNA is a protein called HBcAg (hepatitis B core antigen), which cannot be detected with
	blood tests. Surrounding this is HBsAg, which is actually part of the protective "envelope." This
	envelope surrounds the virus and protects it from attack by the body's immune system. HBsAg
	stands for hepatitis B surface antigen and is the surface antigen of the Hepatitis-B-Virus (HBV)
	S-gene. The capsid of a virus has different surface proteins from the rest of the virus. The
	antigen is a protein that binds specifically on one of these surface proteins. It is commonly
	referred to as the Australian Antigen.
Molecular Weight:	predicted molecular mass of 38.5 kDa after removal of the signal peptide. The apparent
	molecular mass of HBSAG-hFc is 35-70 kDa due to glycosylation.
UniProt:	P31869
Application Details	
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Buffer:	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants
	before lyophilization.
Storage:	-20 °C,-80 °C
Storage Comment:	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for
	use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
	Lyophilized proteins are shipped at ambient temperature.
Expiry Date:	12 months

Hepatitis B virus HBSAG, hFc Tagged protein ELISA

 $0.2~\mu g$ of Hepatitis B virus HBSAG, hFc tagged protein per well

ELISA

Image 1. ELISA plate pre-coated by $2 \mu g/mL$ (100 $\mu L/well$) Hepatitis B virus HBSAG Protein, hFc Tag ((ABIN7538318)) can bind Anti-HBsAg antibody, IgG1 Chimeric mAb in a linear range of 3.2-80 ng/mL.

SDS-PAGE

Image 2. Hepatitis B virus HBSAG Protein, hFc Tag on SDS-PAGE under reducing condition.
