# Datasheet for ABIN7538345 IL-4 Protein (AA 25-153) (mFc Tag)

Image

Overview

1

Quantity:	50 µg
Target:	IL-4 (IL4)
Protein Characteristics:	AA 25-153
Origin:	Human
Source:	Mammalian Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This IL-4 protein is labelled with mFc Tag.

### Product Details

Purpose:	Recombinant Human IL4 Protein with C-terminal mouse Fc tag	
Specificity:	IL4 (His25-Ser153) mFc (Pro99-Lys330)	
Characteristics:	Extracellular Domain Protein	
Purification:	Purified from cell culture supernatant by affinity chromatography	
Purity:	The purity of the protein is greater than 95 % as determined by SDS-PAGE and Coomassie blue	
	staining.	

#### Target Details

Target:	IL-4 (IL4)
Alternative Name:	IL4 (IL4 Products)
Background:	The protein encoded by this gene is a pleiotropic cytokine produced by activated T cells. This

	cytokine is a ligand for interleukin 4 receptor. The interleukin 4 receptor also binds to IL13,
	which may contribute to many overlapping functions of this cytokine and IL13. STAT6, a signal
	transducer and activator of transcription, has been shown to play a central role in mediating the
	immune regulatory signal of this cytokine. This gene, IL3, IL5, IL13, and CSF2 form a cytokine
	gene cluster on chromosome 5q, with this gene particularly close to IL13. This gene, IL13 and
	IL5 are found to be regulated coordinately by several long-range regulatory elements in an over
	120 kilobase range on the chromosome. IL4 is considered an important cytokine for tissue
	repair, counterbalancing the effects of proinflammatory type 1 cytokines, however, it also
	promotes allergic airway inflammation. Moreover, IL-4, a type 2 cytokine, mediates and
	regulates a variety of human host responses such as allergic, anti-parasitic, wound healing, and
	acute inflammation. This cytokine has been reported to promote resolution of neutrophil-
	mediated acute lung injury. In an allergic response, IL-4 has an essential role in the production
	of allergen-specific immunoglobin (Ig) E. This pro-inflammatory cytokine has been observed to
	be increased in COVID-19 (Coronavirus disease 2019) patients, but is not necessarily
	associated with severe COVID-19 pathology. Two alternatively spliced transcript variants of this
	gene encoding distinct isoforms have been reported. [provided by RefSeq, Aug 2020]
Molecular Weight:	predicted molecular mass of 41.2 kDa after removal of the signal peptide. The apparent
	molecular mass of IL4-mFc is 35-55 kDa due to glycosylation.
UniProt:	P05112
Dethermore	
Pathways:	JAK-STAT Signaling, Regulation of Leukocyte Mediated Immunity, Positive Regulation of
	Immune Effector Process, Production of Molecular Mediator of Immune Response, Proton
	Transport, Activated T Cell Proliferation

## Application Details

Restrictions:	For Research Use only	
Handling		
Format:	Lyophilized	
Buffer:	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants before lyophilization.	
Storage:	-20 °C,-80 °C	
Storage Comment:	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
