Target:	Geminin (GMNN)
Alternative Name:	Geminin (GMNN Products)
Pathways:	<a href="#">EGFR Signaling Pathway</a> , <a href="#">DNA Replication</a>

## Application Details

---

Application Notes:	Immunohistochemical (IHC) staining techniques allow for the visualization of antigens via the sequential application of a specific antibody to the antigen (primary antibody), a secondary antibody to the primary antibody and an enzyme complex with a chromogenic substrate with interposed washing steps. The enzymatic activation of the chromogen results in a visible reaction product at the antigen site. The specimen may then be counterstained and coverslipped. Results are interpreted using a light microscope.
