Datasheet for ABIN7540331

Recombinant anti-CD31 antibody (Extracellular Domain) (Atto 647N)

4 Images

Go to Product page

Overview

Quantity:	100 µL
Target:	CD31 (PECAM1)
Binding Specificity:	Extracellular Domain
Reactivity:	Mouse
Host:	Alpaca
Expression System:	E.coli
Antibody Type:	Recombinant Antibody
Clonality:	Multiclonal
Conjugate:	This CD31 antibody is conjugated to Atto 647N
Application:	Immunofluorescence (IF), Immunofluorescence (fixed cells) (IF/ICC), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

Product Details

Purpose:	Alpaca anti-mouse CD31 VHH is a carefully developed and validated nanobody (single-domain antibody) binding to human CD31 (PECAM-1) highly suitabe for tissue staining.
Brand:	LIMAAbody®
Immunogen:	Recombinant protein containing the extracellular domain of murine CD31 protein.
Clone:	3ELC120-3ELC140-3ELC105-3ELC143
Fragment:	single-domain Antibody (sdAb)
Specificity:	Detects endogenous levels of total murine CD31 protein.

Product Details

Cross-Reactivity (Details):	not analysed
Characteristics:	VHH protein tag: C-terminal (6x) His-Tag
Purification:	Affinity-purified antibody fragment.

Target Details

Target:	CD31 (PECAM1)
Alternative Name:	CD31 (PECAM1 Products)
Background:	CD31, also known as PECAM-1, is an adhesion molecule and is expressed on endothelial cells at intercellular junctions and various T cell subsets. It shows altered expression levels in arterial, venous and lymphatic vessels. It is also found to a lesser extent on platelets, as well as most other leukocytes including monocytes and neutrophils. CD31 facilitates homotypic binding to itself, as well as heterotypic binding to the leukocyte integrin alpha V beta III. CD31 plays a crucial role in facilitating the transendothelial migration of leukocytes through the intercellular junctions of vascular endothelial cells. It is one of key regulatory molecules in vascular system.
Molecular Weight:	81 kDa
NCBI Accession:	NP_033868
UniProt:	Q08481
Pathways:	Regulation of Actin Filament Polymerization

Application Details

Application Notes:	Immunofluorescence: 10 µg/mL (frozen sections), 1 µg/mL (cell culture), 20 µg/mL (wholemount)
Comment:	VHH protein tag: C-terminal (6x) His-Tag
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1 mg/mL
Buffer:	PBS, pH 7.4, 0.02% sodium azide
Preservative:	Sodium azide

Handling

Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Do not freeze.
Storage:	4 °C
Storage Comment:	Upon receipt store at 4°C. Stable for 6 months. Do not freeze.
Expiry Date:	6 months
