**Recombinant anti-ELMO1 antibody**[Go to Product page](#)

## Overview

|                    |                                                                                                                               |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------|
| Quantity:          | 100 µL                                                                                                                        |
| Target:            | ELMO1                                                                                                                         |
| Reactivity:        | Human                                                                                                                         |
| Host:              | Rabbit                                                                                                                        |
| Expression System: | Mammalian cells                                                                                                               |
| Antibody Type:     | Recombinant Antibody                                                                                                          |
| Clonality:         | Monoclonal                                                                                                                    |
| Conjugate:         | This ELMO1 antibody is un-conjugated                                                                                          |
| Application:       | Western Blotting (WB), Immunoprecipitation (IP), Immunofluorescence (IF),<br>Immunocytochemistry (ICC), Flow Cytometry (FACS) |

## Product Details

|                   |                                                                                      |
|-------------------|--------------------------------------------------------------------------------------|
| Purpose:          | Rabbit recombinant monoclonal antibody raised against human ELMO1.                   |
| Immunogen:        | Original antibody is raised against recombinant protein corresponding to human ELMO1 |
| Clone:            | R03-7M8R03-7M8                                                                       |
| Isotype:          | IgG                                                                                  |
| Cross-Reactivity: | Human                                                                                |

## Target Details

|         |       |
|---------|-------|
| Target: | ELMO1 |
|---------|-------|

## Target Details

Alternative Name: ELM01 ([ELM01 Products](#))

Background: Engulfment and cell motility 1

Gene ID: 9844

## Application Details

Application Notes: Flow cytometry (1/50-1/100),Immunofluorescence (1/50-1/200),Immunoprecipitation (1/20),Western Blot (1/500-1/1000),The optimal working dilution should be determined by the end user.

Restrictions: For Research Use only

## Handling

Format: Liquid

Buffer: In PBS, 150 mM NaCl, pH 7.4 (50 % glycerol and 0.02 % Sodium azide)

Preservative: Sodium azide

Precaution of Use: This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.

Storage: 4 °C,-20 °C

Storage Comment: Store at 4°C. For long term storage store at -20°C.  
Aliquot to avoid repeated freezing and thawing.
