

Datasheet for ABIN7544441 TMEM100 Protein (AA 1-134) (His tag)

Overview Quantity: 1 mg TMEM100 Target: Protein Characteristics: AA 1-134 Origin: Human Source: HEK-293 Cells Protein Type: Recombinant Purification tag / Conjugate: This TMEM100 protein is labelled with His tag. Application: SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Purpose:	Custom-made recombinat TMEM100 Protein expressed in mammalien cells.
Sequence:	MTEEPIKEIL GAPKAHMAAT MEKSPKSEVV ITTVPLVSEI QLMAATGGTE LSCYRCIIPF
	AVVVFIAGIV VTAVAYSFNS HGSIISIFGL VVLSSGLFLL ASSALCWKVR QRSKKAKRRE
	SQTALVANQR SLFA Sequence without tag. The proposed Purification-Tag is based on
	experiences with the expression system, a different complexity of the protein could make
	another tag necessary. In case you have a special request, please contact us.
Characteristics:	Key Benefits:
	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalien cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our
experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made

Target Details

Target:	TMEM100
Alternative Name:	TMEM100 (TMEM100 Products)
Background:	Transmembrane protein 100,FUNCTION: Plays a role during embryonic arterial endothelium
	differentiation and vascular morphogenesis through the ACVRL1 receptor-dependent signaling
	pathway upon stimulation by bone morphogenetic proteins, such as GDF2/BMP9 and BMP10.
	Involved in the regulation of nociception, acting as a modulator of the interaction between
	TRPA1 and TRPV1, two molecular sensors and mediators of pain signals in dorsal root ganglia
	(DRG) neurons. Mechanistically, it weakens their interaction, thereby releasing the inhibition of
	TRPA1 by TRPV1 and increasing the single-channel open probability of the TRPA1-TRPV1
	complex. {ECO:0000250 UniProtKB:Q9CQG9}.
Molecular Weight:	14.4 kDa
UniProt:	Q9NV29
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.

Restrictions:

For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
