Product Details

- Made to order protein - from design to production - by highly experienced protein experts.
- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity: > 90 % as determined by Bis-Tris Page, Western Blot

Target Details

Target: SLC35D3

Alternative Name: SLC35D3 ([SLC35D3 Products](#))

Background: Solute carrier family 35 member D3 (Fringe connection-like protein 1),FUNCTION: Probable UDP-glucose transmembrane transporter involved in UDP-glucose transport from the cytosol to the lumen of synaptic vesicles (PubMed:34269178). It is involved in platelet dense granules maturation (By similarity). {ECO:0000250|UniProtKB:Q8BGF8, ECO:0000269|PubMed:34269178}., FUNCTION: Alternatively, could function as a molecular adapter enhancing the formation of the PI3KC3-C1/AIC/autophagy initiation complex to promote autophagy in dopaminergic neurons. Could also regulate the plasma membrane localization of the D(1A) dopamine receptor/DRD1 and dopamine signaling. {ECO:0000250|UniProtKB:Q8BGF8}.

Molecular Weight: 44.2 kDa
