| Characteristics:             | Key Benefits:  |
|------------------------------|--|
|                              | <ul> <li>Made to order protein - from design to production - by highly experienced protein experts.</li> <li>Protein expressed in mammalian cells and purified in one-step affinity chromatography</li> <li>The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul> |
|                              | This protein is a made-to-order protein and will be made for the first time for your order. Our  |
|                              | experts in the lab try to ensure that you receive soluble protein.   |
|                              | If you are not interested in a full length protein, please contact us for individual protein fragments.  |
|                              | The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.   |
