This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Background:	SERTA domain-containing protein 3 (Replication protein-binding trans-activator) (RPA-binding trans-activator),FUNCTION: Antiviral interferon-stimulated protein that plays a role in innate immunity and in the suppression of viruses through different mechanisms (PubMed:33147462, PubMed:36594413). Plays a role in the late phase response of TLR-induced immune effector expression (By similarity). During influenza infection, interacts with PB2, PB1, and PA to disrupt the formation of the viral RdRp complex (PubMed:33147462). Inhibits zika virus by interacting with the capsid protein in the nucleolus and reducing its abundance through proteasomal degradation (PubMed:36594413). Strong transcriptional coactivator (PubMed:10982866). {ECO:0000250 UniProtKB:Q9ERC3, ECO:0000269 PubMed:10982866, ECO:0000269 PubMed:33147462, ECO:0000269 PubMed:36594413}.
