

Datasheet for ABIN7547282

DYNLL1 Protein (AA 1-89) (His tag)

()	ve	r\/i	۱۸/
\cup	V C	1 / 1	 v v

Quantity:	1 mg	
Target:	DYNLL1	
Protein Characteristics:	AA 1-89	
Origin:	Human	
Source:	HEK-293 Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This DYNLL1 protein is labelled with His tag.	
Application:	SDS-PAGE (SDS), Western Blotting (WB)	
Product Details		
Purpose:	Custom-made recombinat DYNLL1 Protein expressed in mammalien cells.	
Purpose: Sequence:	Custom-made recombinat DYNLL1 Protein expressed in mammalien cells. MCDRKAVIKN ADMSEEMQQD SVECATQALE KYNIEKDIAA HIKKEFDKKY NPTWHCIVGR

Sequence:	MCDRKAVIKN ADMSEEMQQD SVECATQALE KYNIEKDIAA HIKKEFDKKY NPTWHCIVGR NFGSYVTHET KHFIYFYLGQ VAILLFKSG Sequence without tag. The proposed Purification- Tag is based on experiences with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us. Key Benefits: Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalien cells and purified in one-step affinity chromatography	

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity:

> 90 % as determined by Bis-Tris Page, Western Blot

Grade:

custom-made

Target Details

Target:	DYNLL1 (DYNLL1 Products)	
Alternative Name:		
Background:	Dynein light chain 1, cytoplasmic (8 kDa dynein light chain) (DLC8) (Dynein light chain LC8-type	
	1) (Protein inhibitor of neuronal nitric oxide synthase) (PIN),FUNCTION: Acts as one of several	
	non-catalytic accessory components of the cytoplasmic dynein 1 complex that are thought to	
	be involved in linking dynein to cargos and to adapter proteins that regulate dynein function.	
	Cytoplasmic dynein 1 acts as a motor for the intracellular retrograde motility of vesicles and	
	organelles along microtubules. May play a role in changing or maintaining the spatial	
	distribution of cytoskeletal structures., FUNCTION: Promotes transactivation functions of ESR	
	and plays a role in the nuclear localization of ESR1. {ECO:0000269 PubMed:15891768,	
	ECO:0000269 PubMed:16684779}., FUNCTION: Regulates apoptotic activities of BCL2L11 by	
	sequestering it to microtubules. Upon apoptotic stimuli the BCL2L11-DYNLL1 complex	
	dissociates from cytoplasmic dynein and translocates to mitochondria and sequesters BCL2	
	thus neutralizing its antiapoptotic activity. {ECO:0000269 PubMed:10198631,	
	ECO:0000269 PubMed:15193260}., FUNCTION: Binds and inhibits the catalytic activity of	
	neuronal nitric oxide synthase/NOS1. {ECO:0000250 UniProtKB:P63170}.	
Molecular Weight:	10.4 kDa	
UniProt:	P63167	
Pathways:	M Phase, Tube Formation, Positive Regulation of Endopeptidase Activity	

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
