Characteristics:

Key Benefits:

- Made to order protein from design to production by highly experienced protein experts.
- · Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Alternative Name:	GATA3 (GATA3 Products)
Background:	Trans-acting T-cell-specific transcription factor GATA-3 (GATA-binding factor 3),FUNCTION:
	Transcriptional activator which binds to the enhancer of the T-cell receptor alpha and delta
	genes. Binds to the consensus sequence 5'-AGATAG-3'. Required for the T-helper 2 (Th2)
	differentiation process following immune and inflammatory responses. Positively regulates
	ASB2 expression (By similarity). Coordinates macrophage transcriptional activation and UCP2-
	dependent metabolic reprogramming in response to IL33. Upon tissue injury, acts downstream
	of IL33 signaling to drive differentiation of inflammation-resolving alternatively activated
	macrophages. {ECO:0000250 UniProtKB:P23772, ECO:0000269 PubMed:23824597}.
