	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made

Target Details

Target:	GPR3
Alternative Name:	GPR3 (GPR3 Products)
Background:	G-protein coupled receptor 3 (ACCA orphan receptor),FUNCTION: Constitutively active G-protei
	coupled receptor that maintains high 3'-5'-cyclic adenosine monophosphate (cAMP) levels that
	a plays a role in serveral processes including meiotic arrest in oocytes or neuronal developmen
	via activation of numerous intracellular signaling pathways. Acts as an essential activator of
	thermogenic adipocytes and drives thermogenesis via its intrinsic G(s)-coupling activity withou
	the requirement of a ligand (PubMed:34048700). Has a potential role in modulating a number o
	brain functions, including behavioral responses to stress (By similarity), amyloid-beta peptide
	generation in neurons (By similarity). Stimulates neurite outgrowth in cerebellar granular
	neurons modulated via PKA, ERK, and most strongly PI3K-mediated signaling pathways (By
	similarity). {EC0:0000250 UniProtKB:P35413, EC0:0000269 PubMed:19213921,
