- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target:	LIM2
Alternative Name:	LIM2 (LIM2 Products)
Background:	Lens fiber membrane intrinsic protein (MP18) (MP19) (MP20),FUNCTION: Present in the thicker 16-17 nm junctions of mammalian lens fiber cells, where it may contribute to cell junctional organization. Acts as a receptor for calmodulin. May play an important role in both lens development and cataractogenesis.
Molecular Weight:	19.7 kDa
UniProt:	P55344
Pathways:	Cell-Cell Junction Organization
