Product Details

Key Benefits: Characteristics: Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalien cells and purified in one-step affinity chromatography · The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein. If you are not interested in a full length protein, please contact us for individual protein fragments. The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. Purity: > 90 % as determined by Bis-Tris Page, Western Blot Grade: custom-made **Target Details** Metaxin 1 (MTX1) Target: Alternative Name: MTX1 (MTX1 Products) Background: Metaxin-1 (Mitochondrial outer membrane import complex protein 1),FUNCTION: Involved in transport of proteins into the mitochondrion. Essential for embryonic development (By similarity). {ECO:0000250}. Molecular Weight: 51.5 kDa UniProt: Q13505 Pathways: Dicarboxylic Acid Transport **Application Details** In addition to the applications listed above we expect the protein to work for functional studies **Application Notes:** as well.
