This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target:	KIAA0101 (PAF)
Alternative Name:	PCLAF (PAF Products)
Background:	PCNA-associated factor (Hepatitis C virus NS5A-transactivated protein 9) (HCV NS5A-
	transactivated protein 9) (Overexpressed in anaplastic thyroid carcinoma 1) (OEATC-1) (PCNA-
	associated factor of 15 kDa) (PAF15) (p15PAF) (PCNA-clamp-associated factor),FUNCTION:
	PCNA-binding protein that acts as a regulator of DNA repair during DNA replication. Following
	DNA damage, the interaction with PCNA is disrupted, facilitating the interaction between
	monoubiquitinated PCNA and the translesion DNA synthesis DNA polymerase eta (POLH) at
	stalled replisomes, facilitating the bypass of replication-fork-blocking lesions. Also acts as a
	regulator of centrosome number. {ECO:0000269 PubMed:21673012,
	ECO:0000269 PubMed:23000965}.
Molecular Weight:	12.0 kDa
UniProt:	Q15004
Pathways:	Chromatin Binding
