In case you have a special request, please  contact us.  Key Benefits:  • Made to order protein - from design to production - by highly experienced protein experts.

	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made
Target Details	
Target:	PHLDA2
Alternative Name:	PHLDA2 (PHLDA2 Products)
Background:	Pleckstrin homology-like domain family A member 2 (Beckwith-Wiedemann syndrome
	chromosomal region 1 candidate gene C protein) (Imprinted in placenta and liver protein)
	(Tumor-suppressing STF cDNA 3 protein) (Tumor-suppressing subchromosomal transferable
	fragment candidate gene 3 protein) (p17-Beckwith-Wiedemann region 1 C) (p17-
	BWR1C),FUNCTION: Plays a role in regulating placenta growth. May act via its PH domain that
	competes with other PH domain-containing proteins, thereby preventing their binding to
	membrane lipids (By similarity). {ECO:0000250}.
Molecular Weight:	17.1 kDa
UniProt:	Q53GA4
Pathways:	Regulation of Carbohydrate Metabolic Process
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only
