	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made
Target Details	
Target:	GINS1
Alternative Name:	GINS1 (GINS1 Products)
Background:	DNA replication complex GINS protein PSF1 (GINS complex subunit 1),FUNCTION: Required for
	correct functioning of the GINS complex, a complex that plays an essential role in the initiation
	of DNA replication, and progression of DNA replication forks (PubMed:17417653,
	PubMed:28414293). GINS complex is a core component of CDC45-MCM-GINS (CMG) helicase,
	the molecular machine that unwinds template DNA during replication, and around which the
	replisome is built (PubMed:32453425, PubMed:34694004, PubMed:34700328,
	PubMed:35585232). {ECO:0000269 PubMed:17417653, ECO:0000269 PubMed:28414293,
