Characteristics:	Key Benefits:
	<ul> <li>Made to order protein - from design to production - by highly experienced protein experts.</li> <li>Protein expressed in mammalian cells and purified in one-step affinity chromatography</li> <li>The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein
	fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details	
Target:	RABGAP1L
Alternative Name:	RABGAP1L (RABGAP1L Products)
Background:	Rab GTPase-activating protein 1-like, FUNCTION: GTP-hydrolysis activating protein (GAP) for
	small GTPase RAB22A, converting active RAB22A-GTP to the inactive form RAB22A-GDP
	(PubMed:16923123). Plays a role in endocytosis and intracellular protein transport. Recruited
	by ANK2 to phosphatidylinositol 3-phosphate (PI3P)-positive early endosomes, where it
	inactivates RAB22A, and promotes polarized trafficking to the leading edge of the migrating

cells. Part of the ANK2/RABGAP1L complex which is required for the polarized recycling of
