

## Datasheet for ABIN7551941 ACIN1 Protein (AA 1-1341) (His tag)

Overview

Quantity:	1 mg
Target:	ACIN1
Protein Characteristics:	AA 1-1341
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ACIN1 protein is labelled with His tag.

## Product Details

Purpose:	Custom-made recombinant ACIN1 Protein expressed in mammalian cells.
Sequence:	MWRRKHPRTS GGTRGVLSGN RGVEYGSGRG HLGTFEGRWR KLPKMPEAVG TDPSTSRKMA

	TKRHSRSRSR STPVRDRGGR R Sequence without tag. The proposed Purification-Tag is
	based on experiences with the expression system, a different complexity of the protein
	could make another tag necessary. In case you have a special request, please contact us.
Specificity:	If you are looking for a specific domain and are interested in a partial protein or a different
	isoform, please contact us regarding an individual offer.
Characteristics:	Key Benefits:
	Made to order protein - from design to production - by highly experienced protein experts.

Target:	ACIN1
Alternative Name:	ACIN1 (ACIN1 Products)
Background:	Apoptotic chromatin condensation inducer in the nucleus (Acinus),FUNCTION: Auxiliary
	component of the splicing-dependent multiprotein exon junction complex (EJC) deposited at
	splice junction on mRNAs. The EJC is a dynamic structure consisting of core proteins and
	several peripheral nuclear and cytoplasmic associated factors that join the complex only
	transiently either during EJC assembly or during subsequent mRNA metabolism. Component o
	the ASAP complexes which bind RNA in a sequence-independent manner and are proposed to
	be recruited to the EJC prior to or during the splicing process and to regulate specific excision
	of introns in specific transcription subsets, ACIN1 confers RNA-binding to the complex. The
	ASAP complex can inhibit RNA processing during in vitro splicing reactions. The ASAP complex
	promotes apoptosis and is disassembled after induction of apoptosis. Involved in the splicing
	modulation of BCL2L1/Bcl-X (and probably other apoptotic genes), specifically inhibits
	formation of proapoptotic isoforms such as Bcl-X(S), the activity is different from the
	established EJC assembly and function. Induces apoptotic chromatin condensation after
	activation by CASP3. Regulates cyclin A1, but not cyclin A2, expression in leukemia cells.
	{ECO:0000269 PubMed:10490026, ECO:0000269 PubMed:12665594,
	ECO:0000269 PubMed:18559500, ECO:0000269 PubMed:22203037,
	EC0:000269 PubMed:22388736}.
Molecular Weight:	151.9 kDa
UniProt:	Q9UKV3
Application Details	
Application Notes:	We expect the protein to work for functional studies. As the protein has not been tested for
	functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
