Characteristics:	 Key Benefits: Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made

Target Details

Target:	ASZ1
Alternative Name:	ASZ1 (ASZ1 Products)
Background:	Ankyrin repeat, SAM and basic leucine zipper domain-containing protein 1 (Ankyrin-like protein
	1) (Germ cell-specific ankyrin, SAM and basic leucine zipper domain-containing
	protein),FUNCTION: Plays a central role during spermatogenesis by repressing transposable
	elements and preventing their mobilization, which is essential for the germline integrity. Acts via
	the piRNA metabolic process, which mediates the repression of transposable elements during
	meiosis by forming complexes composed of piRNAs and Piwi proteins and governs the
	methylation and subsequent repression of transposons. Its association with pi-bodies suggests
	a participation in the primary piRNAs metabolic process. Required prior to the pachytene stage
	to facilitate the production of multiple types of piRNAs, including those associated with repeats
	involved in the regulation of retrotransposons. May act by mediating protein-protein
	interactions during germ cell maturation (By similarity). {ECO:0000250}.
Molecular Weight:	53.5 kDa
