

Datasheet for ABIN7553496 CHMP5 Protein (AA 1-219) (His tag)

Overview Quantity: 1 mg CHMP5 Target: Protein Characteristics: AA 1-219 Human Origin: HEK-293 Cells Source: Protein Type: Recombinant Purification tag / Conjugate: This CHMP5 protein is labelled with His tag. Product Details Custom-made recombinant CHMP5 Protein expressed in mammalian cells. Purpose: MNRLFGKAKP KAPPPSLTDC IGTVDSRAES IDKKISRLDA ELVKYKDQIK KMREGPAKNM Sequence:

0044011001	
	VKQKALRVLK QKRMYEQQRD NLAQQSFNME QANYTIQSLK DTKTTVDAMK LGVKEMKKAY
	KQVKIDQIED LQDQLEDMME DANEIQEALS RSYGTPELDE DDLEAELDAL GDELLADEDS
	SYLDEAASAP AIPEGVPTDT KNKDGVLVDE FGLPQIPAS Sequence without tag. The proposed
	Purification-Tag is based on experiences with the expression system, a different complexity
	of the protein could make another tag necessary. In case you have a special request, please
	contact us.
Specificity:	If you are looking for a specific domain and are interested in a partial protein or a different isoform, please contact us regarding an individual offer.
Characteristics:	Key Benefits:
	Rey Denemis.

	 Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC)
Grade:	custom-made

Target Details

Target:	CHMP5
Alternative Name:	CHMP5 (CHMP5 Products)
Background:	Charged multivesicular body protein 5 (Chromatin-modifying protein 5) (SNF7 domain-
	containing protein 2) (Vacuolar protein sorting-associated protein 60) (Vps60)
	(hVps60),FUNCTION: Probable peripherally associated component of the endosomal sorting
	required for transport complex III (ESCRT-III) which is involved in multivesicular bodies (MVBs)
	formation and sorting of endosomal cargo proteins into MVBs. MVBs contain intraluminal
	vesicles (ILVs) that are generated by invagination and scission from the limiting membrane of
	the endosome and mostly are delivered to lysosomes enabling degradation of membrane
	proteins, such as stimulated growth factor receptors, lysosomal enzymes and lipids. The MVB
	pathway appears to require the sequential function of ESCRT-O, -I,-II and -III complexes. ESCRT
	III proteins mostly dissociate from the invaginating membrane before the ILV is released. The
	ESCRT machinery also functions in topologically equivalent membrane fission events, such as
	the terminal stages of cytokinesis and the budding of enveloped viruses (HIV-1 and other
	lentiviruses) (PubMed:14519844). ESCRT-III proteins are believed to mediate the necessary
	vesicle extrusion and/or membrane fission activities, possibly in conjunction with the AAA
	ATPase VPS4. Involved in HIV-1 p6- and p9-dependent virus release (PubMed:14519844).

Target Details		
	{ECO:0000269 PubMed:14519844}.	
Molecular Weight:	24.6 kDa	
UniProt:	Q9NZZ3	
Application Details		
Application Notes:	We expect the protein to work for functional studies. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	The buffer composition is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	
Expiry Date:	12 months
