Characteristics:

- Key Benefits:
- Made to order protein - from design to production - by highly experienced protein experts.
 - Protein expressed in mammalian cells and purified in one-step affinity chromatography
 - The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
 - State-of-the-art algorithm used for plasmid design (Gene synthesis).
- This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.
- If you are not interested in a full length protein, please contact us for individual protein fragments.
- The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target: KDM4B

Alternative Name: KDM4B ([KDM4B Products](#))

Background: Lysine-specific demethylase 4B (EC 1.14.11.66) (JmjC domain-containing histone demethylation protein 3B) (Jumonji domain-containing protein 2B) ([histone H3]-trimethyl-L-lysine(9) demethylase 4B),FUNCTION: Histone demethylase that specifically demethylates 'Lys-

Target Details

9' of histone H3, thereby playing a role in histone code. Does not demethylate histone H3 'Lys-4', H3 'Lys-27', H3 'Lys-36' nor H4 'Lys-20'. Only able to demethylate trimethylated H3 'Lys-9', with a weaker activity than KDM4A, KDM4C and KDM4D. Demethylation of Lys residue generates formaldehyde and succinate (PubMed:16603238, PubMed:28262558). Plays a critical role in the development of the central nervous system (CNS). {ECO:0000250|UniProtKB:Q91VY5, ECO:0000269|PubMed:16603238, ECO:0000269|PubMed:28262558}.
