

Datasheet for ABIN7555071 PRDM1 Protein (AA 1-825) (His tag)

Overview

Quantity:	1 mg
Target:	PRDM1
Protein Characteristics:	AA 1-825
Origin:	Human
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PRDM1 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Purpose:	Custom-made recombinat PRDM1 Protein expressed in mammalien cells.
Sequence:	MLDICLEKRV GTTLAAPKCN SSTVRFQGLA EGTKGTMKMD MEDADMTLWT EAEFEEKCTY

	EDLTRINEEI EKFDISDNAD RLEDVEDDIS VISVVEKEIL AVVRKEKEET GLKVSLQRNM
	GNGLLSSGCS LYESSDLPLM KLPPSNPLPL VPVKVKQETV EPMDP Sequence without tag. The
	proposed Purification-Tag is based on experiences with the expression system, a different
	complexity of the protein could make another tag necessary. In case you have a special
	request, please contact us.
Characteristics:	Key Benefits:
	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalien cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris Page, Western Blot
Grade:	custom-made

Target Details

Target:	PRDM1
Alternative Name:	PRDM1 (PRDM1 Products)
Background:	PR domain zinc finger protein 1 (EC 2.1.1) (BLIMP-1) (Beta-interferon gene positive regulatory
	domain I-binding factor) (PR domain-containing protein 1) (Positive regulatory domain I-binding
	factor 1) (PRDI-BF1) (PRDI-binding factor 1),FUNCTION: Transcription factor that mediates a
	transcriptional program in various innate and adaptive immune tissue-resident lymphocyte T
	cell types such as tissue-resident memory T (Trm), natural killer (trNK) and natural killer T (NKT)
	cells and negatively regulates gene expression of proteins that promote the egress of tissue-
	resident T-cell populations from non-lymphoid organs. Plays a role in the development,

	retention and long-term establishment of adaptive and innate tissue-resident lymphocyte T cell
	types in non-lymphoid organs, such as the skin and gut, but also in other nonbarrier tissues like
	liver and kidney, and therefore may provide immediate immunological protection against
	reactivating infections or viral reinfection (By similarity). Binds specifically to the PRDI element
	in the promoter of the beta-interferon gene (PubMed:1851123). Drives the maturation of B-
	lymphocytes into Ig secreting cells (PubMed:12626569). Associates with the transcriptional
	repressor ZNF683 to chromatin at gene promoter regions (By similarity). Binds to the promoter
	and acts as a transcriptional repressor of IRF8, thereby promotes transcription of osteoclast
	differentiation factors such as NFATC1 and EEIG1 (By similarity).
