

Datasheet for ABIN7556206

Adenylate Kinase 1 Protein (AK1) (AA 1-194) (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	Adenylate Kinase 1 (AK1)
Protein Characteristics:	AA 1-194
Origin:	Mouse
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Adenylate Kinase 1 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Purpose:	Custom-made recombinat Ak1 Protein expressed in mammalien cells.
Sequence:	MEEKLKKAKI IFVVGPGSG KGTQCEKIVQ KYGYTHLSTG DLLRAEVSSG SERGKKLSAI MEKGELVPLD TVLDMLRDAM LAKVDSSNGF LIDGYPREVK QGEEFEQKIG QPTLLLYVDA GAETMTQRLK KRGETSGRVD DNEETIKKRL ETYYNATEPV ISFYDKRGIV RKVNAEGTVD TVFSEVCTYL DSLK Sequence without tag. The proposed Purification-Tag is based on experiences with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.
Characteristics:	Key Benefits: <ul style="list-style-type: none">• Made to order protein - from design to production - by highly experienced protein experts.• Protein expressed in mammalien cells and purified in one-step affinity chromatography• The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.

Product Details

- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Purity: > 90 % as determined by Bis-Tris Page, Western Blot

Grade: custom-made

Target Details

Target: Adenylate Kinase 1 (AK1)

Alternative Name: Ak1 ([AK1 Products](#))

Background: Adenylate kinase isoenzyme 1 (AK 1) (EC 2.7.4.10) (EC 2.7.4.3) (EC 2.7.4.6) (ATP-AMP transphosphorylase 1) (ATP:AMP phosphotransferase) (Adenylate monophosphate kinase) (Myokinase),FUNCTION: Catalyzes the reversible transfer of the terminal phosphate group between ATP and AMP (By similarity). Exhibits nucleoside diphosphate kinase activity, catalyzing the production of ATP, CTP, GTP, UTP, dATP, dCTP, dGTP and dTTP from the corresponding diphosphate substrates with either ATP or GTP as phosphate donor (By similarity). Also catalyzes at a very low rate the synthesis of thiamine triphosphate (ThTP) from thiamine diphosphate (ThDP) and ADP (By similarity). May provide a mechanism to buffer the adenylate energy charge for sperm motility (PubMed:16790685).
{ECO:0000250|UniProtKB:P00568, ECO:0000250|UniProtKB:P05081, ECO:0000269|PubMed:16790685}.

Molecular Weight: 21.5 kDa

UniProt: [Q9R0Y5](#)

Pathways: [Nucleotide Phosphorylation](#), [Ribonucleoside Biosynthetic Process](#)

Application Details

Application Notes: In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.

Restrictions: For Research Use only

Handling

Format: Liquid

Buffer: The buffer composition is at the discretion of the manufacturer.

Handling Advice: Avoid repeated freeze-thaw cycles.

Storage: -80 °C

Storage Comment: Store at -80°C.

Expiry Date: 12 months
