Characteristics:

Key Benefits:

- Made to order protein - from design to production - by highly experienced protein experts.
- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target:

SLC45A2

Alternative Name:

Slc45a2 ([SLC45A2 Products](#))

Background:

Membrane-associated transporter protein (Melanoma antigen AIM1) (Protein AIM-1) (Protein underwhite) (Solute carrier family 45 member 2),FUNCTION: Proton-associated glucose and sucrose transporter (PubMed:25164149, PubMed:35469906). May be able to transport also fructose (PubMed:25164149). Expressed at a late melanosome maturation stage where functions as a proton/glucose exporter which increase luminal pH by decreasing glycolysis (PubMed:32966160, PubMed:35469906). Regulates melanogenesis by maintaining melanosome neutralization that is initially initiated by transient OCA2 and required for a proper function of the tyrosinase TYR (PubMed:32966160, PubMed:35469906). {ECO:0000269|PubMed:25164149, ECO:0000269|PubMed:32966160, ECO:0000269|PubMed:35469906}.
