## Product Details

---

- Made to order protein - from design to production - by highly experienced protein experts.
- Protein expressed in mammalian cells and purified in one-step affinity chromatography
- The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Background:	<p>Ileal sodium/bile acid cotransporter (Apical sodium-dependent bile acid transporter) (ASBT) (Ileal Na<sup>(+)</sup>/bile acid cotransporter) (Ileal sodium-dependent bile acid transporter) (IBAT) (ISBT) (Na<sup>(+)</sup>-dependent ileal bile acid transporter) (Sodium/taurocholate cotransporting polypeptide, ileal) (Solute carrier family 10 member 2),FUNCTION: Plays a critical role in the sodium-dependent reabsorption of bile acids from the lumen of the small intestine (PubMed:10101301). Transports various bile acids, unconjugated or conjugated, such as cholate and taurocholate (PubMed:10101301). Also responsible for bile acid transport in the renal proximal tubules, a salvage mechanism that helps conserve bile acids. Works collaboratively with the Na<sup>(+)</sup>-taurocholate cotransporting polypeptide (NTCP), the organic solute transporter (OST), and the bile salt export pump (BSEP), to ensure efficacious biological recycling of bile acids during enterohepatic circulation (By similarity). {ECO:0000250 UniProtKB:Q12908, ECO:0000269 PubMed:10101301}.</p>
