	The proposed Purification-Tag is based on experiences with the expression system, a

	different complexity of the protein could make another tag necessary. In case you have a

Specificity:	If you are looking for a specific domain and are interested in a partial protein or a different
	isoform, please contact us regarding an individual offer.
Characteristics:	Key Benefits:
	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein
	fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC
Grade:	custom-made
Target Details	
Target:	C13orf18
Alternative Name:	Rubenl (C13orf18 Products)
Background:	Protein associated with UVRAG as autophagy enhancer (Pacer) (Protein Rubicon-
	like),FUNCTION: Regulator of autophagy that promotes autophagosome maturation by
	facilitating the biogenesis of phosphatidylinositol 3-phosphate (PtdIns(3)P) in late steps of
	autophagy. Acts by antagonizing RUBCN, thereby stimulating phosphatidylinositol 3-kinase
	activity of the PI3K/PI3KC3 complex (By similarity). Following anchorage to the
	autophagosomal SNARE STX17, promotes the recruitment of PI3K/PI3KC3 and HOPS
	complexes to the autophagosome to regulate the fusion specificity of autophagosomes with

phosphate (PtdIns(3)P), 4-phosphate (PtdIns(4)P) and 5-phosphate (PtdIns(5)P) (By similarity).

	In addition to its role in autophagy, acts as a regulator of lipid and glycogen homeostasis
	(PubMed:30704899). May act as a tumor suppressor (By similarity).
