This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Target Details

Target:	MIDN
Alternative Name:	Midn (MIDN Products)
Background:	Midnolin (Midbrain nucleolar protein),FUNCTION: Facilitates the ubiquitin-independent proteasomal degradation of stimulus-induced transcription factors such as FOSB, EGR1, NR4A1, and IRF4 to the proteasome for degradation (By similarity). Promotes also the degradation of other substrates such as CBX4 (PubMed:27326929). Plays a role in inhibiting the activity of glucokinase GCK and both glucose-induced and basal insulin secretion (By similarity). {ECO:0000250 UniProtKB:D4AE48, ECO:0000250 UniProtKB:Q504T8, ECO:0000269 PubMed:27326929}.
