Product Details

Key Benefits: Characteristics: Made to order protein - from design to production - by highly experienced protein experts. · Protein expressed in mammalian cells and purified in one-step affinity chromatography · The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. • State-of-the-art algorithm used for plasmid design (Gene synthesis). This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein. If you are not interested in a full length protein, please contact us for individual protein fragments. The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified. > 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC) Purity: Grade: custom-made **Target Details DEPTOR** Target: Alternative Name: Deptor (DEPTOR Products) DEP domain-containing mTOR-interacting protein (DEP domain-containing protein Background: 6), FUNCTION: Negative regulator of the mTORC1 and mTORC2 complexes: inhibits the protein kinase activity of MTOR, thereby inactivating both complexes. DEPTOR inhibits mTORC1 and mTORC2 to induce autophagy. In contrast to AKT1S1/PRAS40, only partially inhibits mTORC1 activity. {ECO:0000250|UniProtKB:Q8TB45}. Molecular Weight: 46.1 kDa UniProt: 0570Y9 PI3K-Akt Signaling, RTK Signaling, Regulation of Cell Size, BCR Signaling, Warburg Effect Pathways: **Application Details Application Notes:** We expect the protein to work for functional studies. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
