transmembrane proteins.

- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made-to-order protein and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

If you are not interested in a full length protein, please contact us for individual protein fragments.

The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Background:	Ras-related protein Rab-34 (Ras-related homolog) (Ras-related protein Rab-39) (Ras-related protein Rah),FUNCTION: Transport protein involved in the redistribution of lysosomes to the peri-Golgi region (PubMed:12475955). Plays a role in the maturation of phagosomes that engulf pathogens, such as S.aureus and M.tuberculosis (By similarity). Plays a role in the fusion of phagosomes with lysosomes (By similarity). Involved in ciliogenesis (By similarity). Acts also as a positive regulator of hedgehog signaling and regulates ciliary function (PubMed:29290584). {ECO:0000250 UniProtKB:Q9BZG1, ECO:0000269 PubMed:12475955, ECO:0000269 PubMed:29290584}.
