PWWP2A Protein (AA 1-730) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	PWWP2A
Protein Characteristics:	AA 1-730
Origin:	Mouse
Source:	HEK-293 Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PWWP2A protein is labelled with His tag.

Product Details

Purpose:	Custom-made recombinant Pwwp2a Protein expressed in mammalian cells.
Sequence:	MAAVAAEAAA TAASPGEGGA GEAEPELEPI PGSEAGTPLP VTATEAAVPD GEADGRQSAP
	QADEQPLPPP PPPPPGELA DSSEAEEAKP PEPAAVPVSP PEQPPAAPEQ PEDAPRPPPA

	VRALLTQFET Sequence without tag. The proposed Purification-Tag is based on experience
	with the expression system, a different complexity of the protein could make another tag
	necessary. In case you have a special request, please contact us.
Specificity:	If you are looking for a specific domain and are interested in a partial protein or a different
	isoform, please contact us regarding an individual offer.
Characteristics:	Key Benefits:
	 Made to order protein - from design to production - by highly experienced protein experts. Protein expressed in mammalian cells and purified in one-step affinity chromatography The optimized expression system ensures reliability for intracellular, secreted and transmembrane proteins. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	If you are not interested in a full length protein, please contact us for individual protein fragments.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
Purity:	> 90 % as determined by Bis-Tris PAGE, anti-tag ELISA, Western Blot and analytical SEC (HPLC
Grade:	custom-made
Target Details	
Target:	PWWP2A
Alternative Name:	Pwwp2a (PWWP2A Products)
Background:	PWWP domain-containing protein 2A,FUNCTION: Chromatin-binding protein that acts as an adapter between distinct nucleosome components (H3K36me3 or H2A.Z) and chromatin-modifying complexes, contributing to the regulation of the levels of histone acetylation at actively transcribed genes (PubMed:30228260, PubMed:33235983). Competes with CHD4 an MBD3 for interaction with MTA1 to form a NuRD subcomplex, preventing the formation of full NuRD complex (containing CHD4 and MBD3), leading to recruitment of HDACs to gene
	Native complex (containing of 104 and 10003), leading to recruitment of 110Ac3 to gene

Plays a role in facilitating transcriptional elongation and repression of spurious transcription

Target Details

Expiry Date:

12 months

Taryer Details	
	initiation through regulation of histone acetylation (PubMed:30228260, PubMed:33235983).
	Essential for proper mitosis progression (By similarity). {ECO:0000250 UniProtKB:Q96N64,
	ECO:0000269 PubMed:30228260, ECO:0000269 PubMed:33235983}.
Molecular Weight:	79.4 kDa
UniProt:	Q69Z61
Application Details	
Application Notes:	We expect the protein to work for functional studies. As the protein has not been tested for
	functional studies yet we cannot offer a guarantee though.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
